About me

Product designer with 14 years of experience, from agencies and startups to market leaders — Alfa-Bank, MAPS.ME, BelkaCar. I design architecture and work on product tasks every day, help shape features and see solutions through to implementation. In recent years I have led design teams and built processes around design. Incomplete briefs don't scare me: I find the data myself, run interviews and tests, and validate hypotheses through MVPs.

Alfa Bank — 2024 — present

Senior Product Designer

What I do: product design of banking services at one of Russia's largest private banks — from research and user flows to mockups in the bank's design system and support during development.

iGaming App — 2023 — 2024

Lead Product Designer

What I did: set up the design process and rebuilt the key revenue flows of a betting company's mobile app: merged registration and identity verification into one step, moved the platforms to a single UI, designed deposits and modals for every case. Worked with legacy and stakeholders, mentored designers.

Results: conversion to completed registration **+48%**, to first deposit **+44%**; registration takes under 2 minutes instead of 3+.

QUANTORI — 2022 — 2023

Senior Product Designer

What I did: improved the experience of a big data platform on drug development for pharma analysts and investors. Interviewed 12 analysts, created a design system, redesigned charts, tables, search, favorites, collections and alerts.

Results: uninterrupted work time grew from 27 to **41 minutes**, analysts find the right metric **3 times** faster, SUS rose from 52 to **81**, empty search results — **9%** instead of 38%. After the redesign, license sales grew by **27.5%**.

метр квадратный — 2020 — 2022

Senior Product Designer, Team Lead of 3 designers

What I did: brought five real estate services into one ecosystem on iOS and Android: home search, mortgage, deal and renovation. Built the end-to-end user journey and communication model, designed about 100 search screens, tested hypotheses and planned the roadmap.

Results: MVP in **4 months**, mortgage form **40%** shorter, retention **+27%**, MVP scope 35% smaller; 36,400+ MAU, 4.78 rating in the App Store.

MAPS.ME × Parity — 2019 — 2020

Senior Product Designer, Team Lead

What I did: led the design of Parity, a crypto service inside MAPS.ME — secure storage and real-time money transfers worldwide. Created the brand from scratch, researched competitors and the market, launched the website and apps.

Results: app rating **4.7** in the App Store and 4.4 in Google Play.

belkacar — 2018 — 2019

Senior Product Designer

What I did: redesigned the website and apps of the second-largest carsharing service based on support feedback and UX test results, maintained documentation for development.

Results: rating **4.6** in the App Store and 4.0 in Google Play.

Early experience — 2012 — 2018

Revo Technologies — installment flows on partner websites, from choosing a product to payment; **Hyperboloid Agency** — research-based strategy and design of client products; **Liga Stavok** — designed the mobile app of Russia's No. 1 bookmaker; **LEXION development** — designed the website of a property developer
